

# FENCE ALERT

Fence Alert helps to notify you when your fence voltage is below the level required for effective shock.

1. Warning Light begins flashing when voltage is too low to be effective
2. Visible up at long distances (up to 1.5 Km)
3. Robust impact and water resistant case designed to withstand extensive periods outdoors
4. Can be used on any type of electric fence including steel or aluminum wire and on portable poly products
5. Works with all energizers, the item is not intended to flash when the fence is operating properly
6. No ground wires or external power sources required
7. Replaceable CR2032 button cell battery
8. Battery life: up to 2 weeks continuous flashing and 1 year on stand by
9. Two Settings can be selected with preset voltage drop triggers setting one <math><1000\text{ V}</math>, setting two <math><2000\text{V}</math>
