

HOW TO USE BEAR SPRAY

Know how to use bear spray and **ALWAYS** carry bear spray when you're in the wilderness

CHECK THE EXPIRY
on your bear spray.

Like any aerosol-based spray product, after the expiry, the propellant deteriorates and will not expel the product at the desired range.

Choose destinations away from known bears, travel in groups and make noise while in the wilderness.

**IT'S NEVER WORTH
THE RISK TO GET
TOO CLOSE**

Step 1:

REMOVE SAFETY

Every can of bear spray comes with a safety latch, this will need to be removed in order to deploy the bear spray.

Step 2:

PRESS TRIGGER

Hold the can with two hands, placing one on the trigger. To deploy, press the trigger with your thumb.

Step 3:

SPRAY IN BURSTS

When you are in range of the bear, aim for the nose and eyes, spraying in bursts.

Step 4:

RETURN TO SAFETY

Once you are safe, the safety tab should be returned to the bear spray canister to avoid any remaining bear spray from accidentally being deployed.
